

- Synergy of inorganic and organic inks in bioprinted tissue substitutes: Construct stability and cell response during long-term cultivation in vitro. Liu S, Bernhardt A, Wirsig K, Lode A, Hu Q, Gelinsky M, Kilian D. [Composites Part B: Engineering 2023](#)
- Multifunctional Three-Dimensional Printed Copper Loaded Calcium Phosphate Scaffolds for Bone Regeneration. Pillai A, Chakka J, Heshmathi N, Zhang Y, Alkadi F, Maniruzzaman M. [Pharmaceuticals 2023](#)
- Egg white improves the biological properties of an alginate-methylcellulose bioink for 3D bioprinting of volumetric bone constructs. Liu S, Kilian D, Ahlfeld T, Hu Q, Gelinsky M. [Biofabrication 2023](#)
- 3D extrusion printing of density gradients by variation of sinusoidal printing paths for tissue engineering and beyond. Kilian D, Holtzhausen S, Groh W, Sembdner P, Czichy C, Lode A, Stelzer R, Gelinsky M. [Acta Biomaterialia 2022](#)
- Alternative Geometries for 3D Bioprinting of Calcium Phosphate Cement as Bone Substitute. Blankenburg J, Vinke J, Riedel B, Zankovic S, Schmal H, Seidenstuecker M. [Biomedicines 2022](#)
- 3D Plotting of Calcium Phosphate Cement and Melt Electrowriting of Polycaprolactone Microfibers in One Scaffold: A Hybrid Additive Manufacturing Process. Kilian D, von Witzleben M, Lanaro M, Wong CS, Vater C, Lode A, Allenby MC, Woodruff MA, Gelinsky M. [Journal of Functional Biomaterials 2022](#)
- Treatment of Critical Size Femoral Bone Defects with Biomimetic Hybrid Scaffolds of 3D Plotted Calcium Phosphate Cement and Mineralized Collagen Matrix. Culla AC, Vater C, Tian X, Bolte J, Ahlfeld T, Bretschneider H, Pape A, Goodman SB, Gelinsky M, Zwillingenberger S. [International Journal of Molecular Sciences 2022](#)
- Magnetic resonance imaging as a tool for quality control in extrusion-based bioprinting. Schmiege B, Gretzinger S, Schuhmann S, Guthausen G, Hubbuch J. [Biotechnology Journal 2022](#)
- Composites consisting of calcium phosphate cements and mesoporous bioactive glasses as a 3D plottable drug delivery system. Richter RF, Ahlfeld T, Gelinsky M, Lode A. [Acta Biomaterialia 2022](#)
- GDF-5 variant loading on composite scaffolds promotes spinal fusion through coupling of osteogenesis and angiogenesis: a preclinical study in rhesus monkeys. Li L, Ling Z, Vater C, Chen X, Huang S, Qi Q, Zhou Z, Li X, Zou Z, Gelinsky M, Lou J, Zou X, Stiehler M. [Smart Materials in Medicine 2021](#)
- 3D printing of patient-specific implants for osteochondral defects: workflow for an MRI-guided zonal design. Kilian D, Sembdner P, Bretschneider H, Ahlfeld T, Mika L, Lützner J, Holtzhausen S, Lode A, Stelzer R, Gelinsky M. [Bio-Design and Manufacturing 2021](#)
- Comparison of amniotic membrane versus the induced membrane for bone regeneration in long bone segmental defects using calcium phosphate cement loaded with BMP-2. Fenelon M, Etchebarne M, Siadous R, Grémare A, Durand M, Sentilhes L, Catros S, Gindraux F, L'Heureux N, Fricain JC. [Materials Science & Engineering C 2021](#)
- Coaxial Micro-Extrusion of a Calcium Phosphate Ink with Aqueous Solvents Improves Printing Stability, Structure Fidelity and Mechanical Properties. Bagnol R, Sprecher C, Peroglio M, Chevalier J, Mahou R, Büchler P, Richards G, Eglin D. [Acta Biomaterialia 2021](#)
- Toward Biofabrication of Resorbable Implants Consisting of a Calcium Phosphate Cement and Fibrin - A Characterization In Vitro and In Vivo. Ahlfeld T, Lode A, Richter RF, Pradel W, Franke A, Rauner M, Stadlinger B, Lauer G, Gelinsky M, Korn P. [International Journal of Molecular Sciences 2021](#)
- 3D Bioprinting of Osteochondral Tissue Substitutes – In Vitro Chondrogenesis in Multi-Layered Mineralized Constructs. Kilian D, Ahlfeld T, Akkineni AR, Bernhardt A, Gelinsky M, Lode A. [Scientific Reports 2020](#)

- 3D Printing of Bone Grafts for Cleft Alveolar Osteoplasty – In vivo Evaluation in a Preclinical Model. Korn P, Ahlfeld T, Lahmeyer F, Kilian D, Sembdner P, Stelzer R, Pradel W, Franke A, Rauner M, Range U, Stadlinger B, Lode A, Lauer G, Gelinsky M. [Frontiers in Bioengineering and Biotechnology 2020](#)
- A Novel Plasma-Based Bioink Stimulates Cell Proliferation and Differentiation in Bioprinted, Mineralized Constructs. Ahlfeld T, Cubo-Mateo N, Cometta S, Guduric V, Vater C, Bernhardt A, Akkineni AR, Lode A, Gelinsky M. [ACS Applied Materials & Interfaces 2020](#)
- Development and Characterization of Composites Consisting of Calcium Phosphate Cements and Mesoporous Bioactive Glass for Extrusion-Based Fabrication. Richter RF, Ahlfeld T, Gelinsky M, Lode A. [Materials 2019](#)
- 3D Plotted Biphasic Bone Scaffolds for Growth Factor Delivery: Biological Characterization In Vitro and In Vivo. Ahlfeld T, Schuster FP, Förster Y, Quade M, Akkineni AR, Rentsch C, Rammelt S, Gelinsky M, Lode A. [Advanced Healthcare Materials 2019](#)
- A Methylcellulose Hydrogel as Support for 3D Plotting of Complex Shaped Calcium Phosphate Scaffolds. Ahlfeld T, Köhler T, Czichy C, Lode A, Gelinsky M. [Gels 2018](#)
- Bioprinting of Mineralized Constructs Utilizing Multichannel Plotting of a Self-Setting Calcium Phosphate Cement and a Cell-Laden Bioink. Ahlfeld T, Doberenz F, Kilian D, Vater C, Korn P, Lauer G, Lode A, Gelinsky M. [Biofabrication 2018](#)
- Endosteal and Perivascular Subniches in a 3D Bone Marrow Model for Multiple Myeloma. Braham MVJ, Ahlfeld T, Akkineni AR, Minnema MC, Dhert WJA, Öner FC, Robin C, Lode A, Gelinsky M, Alblas J. [Tissue Engineering Part C: Methods 2018](#)
- Strontium(II) and Mechanical Loading Additively Augment Bone Formation in Calcium Phosphate Scaffolds. Reitmaier S, Kovtun A, Schuelke J, Kanter B, Lemm M, Hoess A, Heinemann S, Nies B, Ignatius A. [Journal of Orthopaedic Research 2017](#)
- In Situ Functionalization of Scaffolds During Extrusion-Based 3D Plotting Using a Piezoelectric Nanoliter Pipette. Giron S, Lode A, Gelinsky M. [Journal of 3D Printing in Medicine 2016](#)
- Design and Fabrication of Complex Scaffolds for Bone Defect Healing: Combined 3D Plotting of a Calcium Phosphate Cement and a Growth Factor-Loaded Hydrogel. Ahlfeld T, Akkineni AR, Förster Y, Köhler T, Knaack S, Gelinsky M, Lode A. [Annals of Biomedical Engineering 2016](#)
- 3D Plotting of Growth Factor Loaded Calcium Phosphate Cement Scaffolds. Akkineni AR, Luo Y, Schumacher M, Nies B, Lode A, Gelinsky M. [Acta Biomaterialia 2015](#)
- Fabrication of Porous Scaffolds by Three-Dimensional Plotting of a Pasty Calcium Phosphate Bone Cement Under Mild Conditions. Lode A, Meissner K, Luo Y, Sonntag F, Glorius S, Nies B, Vater C, Despang F, Hanke T, Gelinsky M. [Journal of Tissue Engineering and Regenerative Medicine 2014](#)
- Well-Ordered Biphasic Calcium Phosphate–Alginate Scaffolds Fabricated by Multi-Channel 3D Plotting Under Mild Conditions. Lou Y, Lode A, Sonntag F, Nies B, Gelinsky M. [Journal of Materials Chemistry B 2013](#)
